

Take a stand against *Salmonella* with...

Bovilis[®]S

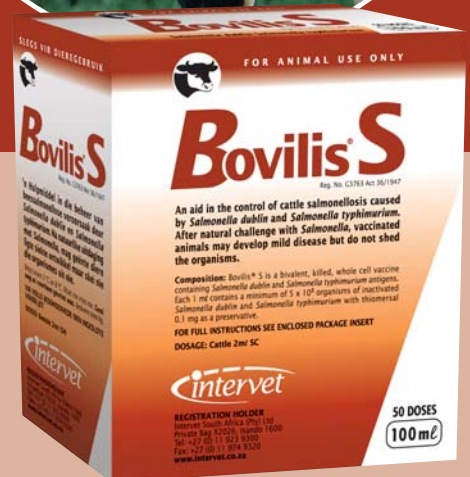

Reg. No. G3763 Act 36/1947

Developed to protect against salmonellosis in cows and paratyphoid in calves

- ✓ Effective protection against calf paratyphoid and calf diarrhoea⁽¹⁾
- ✓ Can prevent illness and abortion in cows and heifers⁽¹⁾
- ✓ Vaccinating cows and heifers prior to calving protects their calves⁽²⁾
- ✓ **Primary vaccination** - vaccinate cows at 8 weeks (or drying off) and 3 weeks (or steam-up) prior to calving
- ✓ **Yearly booster** - anytime prior to calving, between drying-off and steaming-up

(1) Caused by *Salmonella* Dublin and *Salmonella* Typhimurium

(2) Immunity achieved via colostrum intake
