

FOR EXTERNAL ANIMAL USE ONLY

OTOCLEAN

Reg. No. G3459 (Act 36/1947)

Namibia Reg. No. V11/3.1.2.1138 NS0

INDICATIONS

Used in cats and dogs for the routine maintenance of ear hygiene, the prevention of otitis and for instillation into the ear canal before the use of otitis externa treatment.

COMPOSITION

Contains: Salicylic acid 0,23 % *m/v*

Lactic acid, oleic acid, *Cucumis sativus*, *Cetraria islándica*, *Mimosa tenuiflora*, propylene glycol, glycerin, polyethylene glycol.

STORAGE

Store at room temperature below 25 °C.

EFFICACY

Otoclean used in the ear canals as directed:

- Breaks up and removes cerumen.
- Prevents and controls irritation.
- Controls the ear canal microflora (*Malassezia*).
- Has a cleaning effect on the ear canal (dead cells, secretions).
- Has an antipruritic effect.
- Has a moisturising effect.

WARNINGS

- KEEP OUT OF REACH OF CHILDREN, UNINFORMED PERSONS AND ANIMALS.
- Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

DOSAGE AND DIRECTIONS FOR USE - USE ONLY AS DIRECTED

Instill **Otoclean** into each of the dog's or cat's ear canals in sufficient quantities for the animal's size:

Large animals – Instill 1 bottle (5 ml) into each ear.

Medium-sized and small animals – Instill half a bottle (2,5 ml) into each ear.

1. Open the bottle by twisting the plastic cap off.

2. Lift the upper end of the ear flap and introduce the contents of the bottle into the ear canal, squeezing the bottle firmly to instill all or half of the contents as appropriate.

3. Rub the base of the ear for a few seconds to encourage contact between the cleaning solution and the ear.

The frequency of application of **Otoclean** will depend on the reason for use.

- **Ear hygiene, unpleasant odour, etc.**

In animals which have a large collection of dirt or wax, an unpleasant odour is usually noticed coming from the ears. In these cases, instill **Otoclean** into each ear canal every 24 hours for up to 8 consecutive days, until complete cleanliness of the ear canal is obtained.

- **Otitis prevention**

It is convenient to use **Otoclean** as a routine hygiene practice in breeds prone to suffer from otitis as a consequence of the anatomy of its ears. One instillation every week will maintain the external ear duct in optimal condition.

- **Before use of an otitis externa treatment**

In animals with otitis, the ear canal should be cleaned and the accumulation of dirt, wax and secretions eliminated in order to improve the efficacy of the therapeutic products to be administered. Both ears should be treated with **Otoclean** and preferably left for 30 minutes before applying a medicinal ear solution.

PRESENTATION

Carton containing 16 single dose plastic bottles of 5 ml each.
