

## FOR ANIMAL USE ONLY

### BOOSTIN

Reg. No. G2320 (Act 36/1947)

**Only for use by or under the supervision of persons registered in terms of or authorised in terms of section 23 (1) (c) of the Veterinary and Para-Veterinary Professions Act, 1982 (Act 19 of 1982).**

### INDICATIONS

**Boostin** is an injectable long-acting bovine somatotropin used to increase milk production in well-nourished and properly managed dairy cows from the time of peak lactation to drying off.

**Boostin** increases the efficiency of milk production in lactating dairy cows by increasing the quantity of milk produced without altering the normal composition of milk. Bovine somatotropin is a natural protein produced by the pituitary gland and promotes the use of nutrient energy for milk production.

### COMPOSITION

Each 2 ml cartridge contains 500 mg recombinant bovine somatotropin.

### STORAGE

- Store between 2 °C and 8 °C.
- Do not freeze.

### WARNINGS

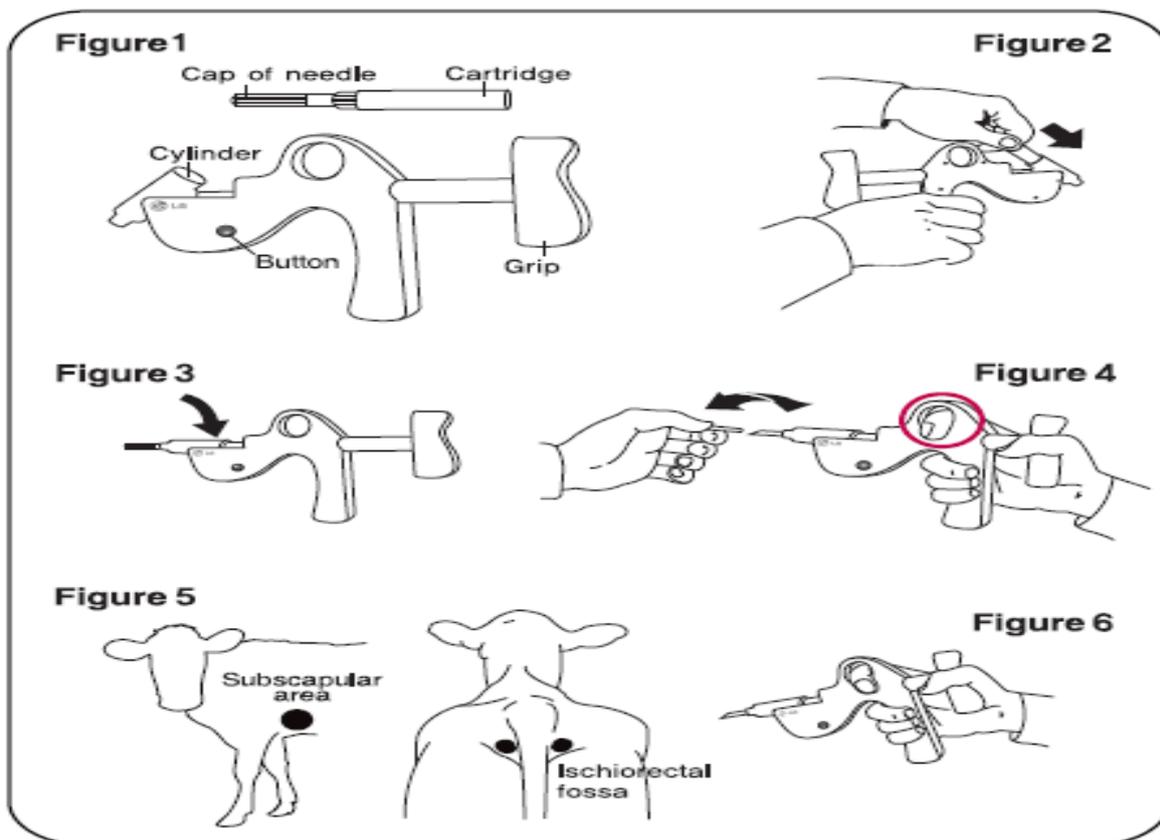

- **Withdrawal period:** Do not administer to dairy cows earlier than 60 days after calving. Do not administer to cows during the first lactation.
- Ensure that the injection site is clean and dry. Administer only by subcutaneous injection.
- KEEP OUT OF REACH OF CHILDREN, UNINFORMED PERSONS AND ANIMALS.
- Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and inform the registration holder.

### PRECAUTIONS

Warm cartridges by hand immediately before injection.

### DIRECTION FOR USE - USE ONLY AS DIRECTED

- Administer the contents of 1 full cartridge (500 mg bovine somatotropin) subcutaneously every 14 days.
- Dispose of empty containers/cartridges and all unused contents according to local waste disposal regulations.
- Refer to the diagram below for instructions on loading the cartridge into the injector.

**Diagram:** Assembly of the cartridge and injector

**PRESENTATION**

25 x 2 ml cartridges
