

## FOR ANIMAL USE ONLY

### BOVI-TECT P

Reg. No. G3002 (Act 36/1947)

Namibia Reg. No. V02/24.4/689 NSO

### INDICATIONS

*Mannheimia (Pasteurella) haemolytica* vaccine for cattle. For optimum usage consult your veterinarian.

### COMPOSITION

Cell-free supernatant of *Mannheimia (Pasteurella) haemolytica* biotype A serotype 1/17 leukotoxin.

### STORAGE

- Store in a refrigerator between 2 °C and 8 °C.
- Do not freeze.
- Protect from light.

### WARNINGS

- For use in cattle from 1 months of age.
- Dispose of any unused vaccine as well as empty vaccine containers and vaccination equipment according to local waste disposal regulations and do not reuse for any other purpose.
- KEEP OUT OF REACH OF CHILDREN AND UNINFORMED PERSONS.
- Although this vaccine has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

### DIRECTIONS FOR USE - USE ONLY AS DIRECTED

- The vaccine is recommended for inclusion in a vaccination programme of cattle at processing. Its intended use is to reduce morbidity and mortalities due to *Mannheimia (Pasteurella) haemolytica* related pneumonia.
- The vaccine can be used safely in dairy, extensive beef and stud animals older than 1 month of age.
- Use sterile needles and syringes.
- Where chemical sterilisation is used for both needles and syringes they must be thoroughly washed in clean water to ensure that the modified live virus component is not destroyed.
- Inject 1 ml per head subcutaneously using sterile precautions.
- Ensure that the vaccine is kept cool and away from direct sunlight while administering.
- A booster vaccine is recommended after 10 to 14 days for an optimal immune response.

### DOSAGE

1 ml per animal administered subcutaneously.

### PRESENTATION

100 ml Polypropylene container with 100 ml fluid content.

10 ml Polypropylene container with 10 ml fluid content.
